Truck Bodies

TAFCO took the frameless grain trailer design a step further when they designed the revolutionary SCOTT GRAIN BODY which has replaced the old wood stake and slat bodies of yesteryear. This design offers light weight and high strength.

ALUMINUM GRAIN BODIES

LATEST IN GRAIN BODY DESIGN

Kann bodies are carefully welded resulting in a dependable and durable unitized unit. With 92" of interior clearance and square corners, these units are ideal for palletized loads as well as bulk. Care was taken to eliminate any obstruction which could tear or damage bags.

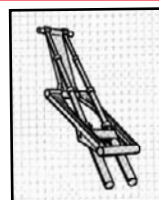

HOPPER BOTTOM PUP TRAILER

The KANN Pup Trailer has a steerable front axle to decrease tire wear and body stress under heavy loads. The steerable axle can be locked when backing. It utilizes an adjustable tongue to achieve maximum loading and still meet DOT requirements!
