

Vander Haag's Inc.

www.vanderhaags.com

Reduce! Reuse! Recycle!

Benefits of Recycling

- ✓ Reduces the amount of waste sent to landfills & incinerators
- ✓ Conserves natural resources such as timber, water & minerals
- ✓ Increases economic security by tapping a domestic source of materials
- ✓ Prevents pollution by reducing the need to collect new raw materials energy
- ✓ Supports American manufacturing and conserves valuable resources
- ✓ Helps create jobs in the recycling & manufacturing industries in the USA
- ✓ Buying used parts saves money

**160+ Quality Used Parts were recycled
from this 2023 Kenworth T680 -
saving our customers \$100,000+
with buying used vs new!**

**Don't wait for lengthy OEM delays -
Our parts are ready for you NOW!**

Thank you for Recycling
With your help, we are saving our planet - one truck at a time!

When my grandfather, John C. Vander Haag, Sr., (shown 2nd from left) started South Side Junkyard in Sanborn, Iowa, I don't think he ever dreamed it would grow into the business we are today! In 1939 he began collecting and selling scrap iron and various items from farmers around the countryside. My father, John C. Vander Haag, Jr., began working in the business in January 1948. He changed our business from being a "junkyard" to a late model automotive salvage yard and renamed the company South Side Salvage. In 1970, as the business continued to grow, Dad saw the need to expand to Spencer, Iowa, and modernized our name to Vander Haag's, Inc., eventually making the decision to change to heavy duty truck parts sales.

Since our move to Spencer, we have expanded our business to include locations in Des Moines & Council Bluffs, Iowa; Sioux Falls, South Dakota; Kansas City, Missouri; Winamac & Indianapolis, Indiana, and most recently in Columbus, Ohio. We attribute our continued growth to our loyal employees and our commitment to providing quality products and service for our customers.

Having grown up in the business, I worked many summers trying to get a feel for all the aspects of our industry and joined the company full time after graduating from Dordt College in 1990. I've seen how hard my father worked to make Vander Haag's, Inc. what it is today, and am proud to carry on his legacy.

This year we are celebrating our 84th year in business. We are dedicated to providing solutions to all of your truck-related needs in this decade and beyond.

*John M. Vander Haag
President*

All of this purchasing adds up to a **LARGER SELECTION**
+ BIGGER SAVINGS\$ for YOU, our Valued Customer!

The Life of a Parts Unit

Salvage trucks and equipment units are purchased from individuals, fleets, auctions, farms, etc. and towed or driven to one of our 7 dismantling facilities.

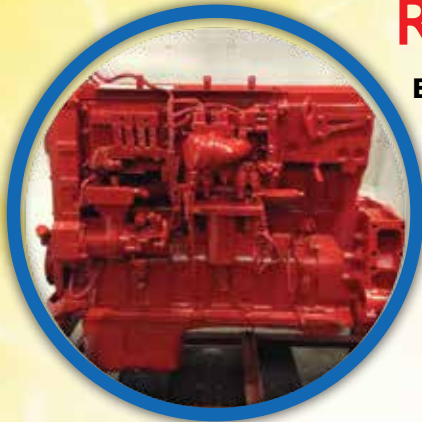

- 1** Upon arrival, the unit is inventoried and the body components are inspected thoroughly, any flaws in each part are photographed and described.
- 2** The unit is scheduled for dismantling and engine inspection.
- 3** Each engine is run-tested, and a video is taken and displayed on our YouTube channel allowing our customers to watch real-time.
- 4** Differentials, Transmissions, Steering Gears, Auxiliary Power Units, Electronic Components, DPF Systems, Radar Warning Systems, Seats, and Tires and Rims are inspected, then photographed and stored in our warehouses - ready for immediate purchase & shipping!
- 5** The remainder of the unit is placed in outdoor storage for approximately 2 years where any part including the frame is available for sale!
- 6** After a period of 2 years the remaining scraps of the unit are sent to a metal recycling facility and another unit takes its place in the system.

VANDER HAAG'S
Your #1 Choice for
Recycled Parts!

our current Parts Units

We treat every engine with Tender Loving Care!

RUN TESTED!

Every engine is run up to operating temperature and monitored for leaks, smoke, reservoir pressure and injector performance.

Every used engine has documented oil pressure, blowby, HP, ECM hours & mileage and exhaust temperatures.

FULLY INSPECTED!

Every used engine is visually inspected: front to back, top to bottom, internally & externally. The valve cover is then removed to inspect rollers, cams, jakes, valve springs, wiring and other top end components.

Every engine is rotated 180 degrees to inspect the crank, cylinder walls, piston oil coolers and other bottom end components.

All bearings are inspected & replaced as needed.

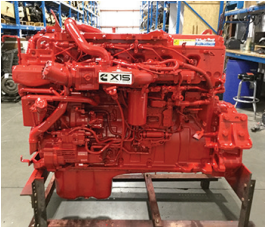

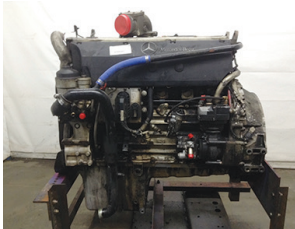

SHIPPED WITH CARE!

Our engines are shipped on a steel stand to prevent tipping & mishandling. Your core return can be positioned in the stand for quick & easy return.

Every used transmission goes through a rigorous inspection process, ensuring a quality part for you!

Each step of our inspection process is documented and photographed. This information is then "attached" to its specific transmission record enabling you to log on to www.vanderhaags.com and easily view this history before your purchase.

Our Used Transmissions carry our 180 Day Limited Parts & Labor Warranty!

Scan to go directly to our Transmission tab

INTERNAL INSPECTION!

Every Vander Haag's used transmission undergoes a thorough internal inspection prior to being shipped. Each inspection includes:

- input shaft & bearings
- drive & overdrive sets
- auxiliary synchronizer
- all sliding clutches
- output shaft & yoke
- shift top & rail fork
- main-shaft thrust washers

AIR CONTROL INSPECTION!

Each air operated transmission that we sell has the air control system tested to ensure that it will shift properly and operate as intended.

TOP COVER INSPECTION!

All transmission top covers are visually inspected for abnormalities such as wear on the shift forks and worn pins.

If you use your truck for a truck, then you'll appreciate all the standard features on a Bradford Built truck bed. Things like 1/8" thick tread plate floor, a 30,000 lb. rated gooseneck hitch and the incredibly strong receiver type bumper hitch. With the 4" tall flip-up side rails, you won't be back tracking, looking for your chains or spare tire. Chain "keyholes" in the headache rack, flush-mounted D-rings in the side rails and stake pockets in the deck make it easy to secure any load. The sealed beam lights are flush mounted and there is a 7-pole plug-in for your trailer. The rear corners of the deck are tapered so backing up a little too close to the dock won't take out the lights. The forward taper allows for locating the gooseneck ball further forward while still clearing your trailer gussets in a turn. The powder coat paint gives it an attractive, durable and easy-to-wash surface.

Hoists & Truck Bodies

Tafo took the frameless grain trailer design a step further when they designed the revolutionary Scott Grain Body which replaced the old wood stake and slat bodies of yesteryear. This design offers light weight and high strength.

**Many Sizes & Body Types
to Choose From!

Henderson Dump Bodies

MAGNUM

- Rock & Demolition Body

The Magnum is available in 12' to 19' lengths, it is designed heavy for demolition, but is also offered in light weight steels like the 3mm AR500 for general hauling. It's elliptical design is virtually self-cleaning and the 5" formed long sills provide for a low mounting height and a lower center of gravity.

MARK THREE

- Utility Dump Body

A "every day" sized dump truck with the ruggedness of its bigger relatives. Clean unibody design with one-piece floor. Easy to install, optional steel side boards accommodate larger loads.

MARK FOUR

- Contractor Dump Body

A contractor's best friend. Need versatility? This is it. Optional split drop-sides let you decide what to unload where. Add optional steel side board and you'll increase load capacity nearly 100%.

MARK E

- Single Axle Dump Body

This single-axle unibody dump body proves that lightweight and rugged go together. There's not a tougher utility body anywhere. It comes in lengths ranging from 10' - 12' with side heights of 24" or 30".

MARK E - Tandem Axle Dump Body

The Henderson Engineering Team pulled out all the stops this time to design a dump body that would allow each customer to fully customize and make his body his very own.

Hook Lift Hoist Systems

Don't forget, we sell & install many types of specialty equipment. Including these Swaploader Lifts!

Buy it NOW at www.vanderhaags.com ~ Shipping Nationwide & Beyond!

From light duty to extra heavy duty applications, you will find a Bibeau dump body to meet all your needs & expectations.

The standard construction of all Bibeau dump bodies includes: unibody construction using top quality materials, continuous welds throughout, integrated conduit for heating, a door latching or cartridge system ready for pneumatic hook-up, shot blasted and primed with a highly resistant industrial primer!

RKI **Commercial Grade** **Truck Equipment**

Truck Boxes **& Accessories** **Truck Bodies** **Cranes**

Quality Service Bodies for the Long Haul If your business depends on trucks, you can depend on RKI.

**** LIFETIME WARRANTY ****

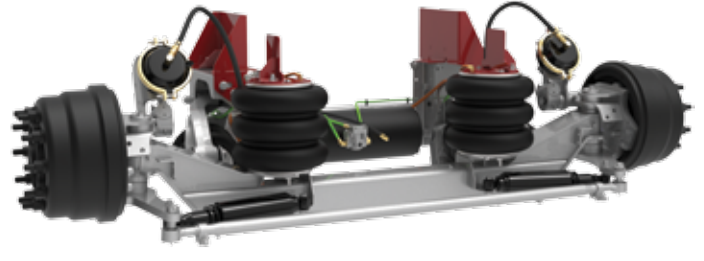

Our steel truck boxes are crafted from 14-gauge (minimum) steel with stainless steel hinges and full-size stainless steel paddle latches, and come with a tough polyester powder coat finish available in black or white. RKI aluminum truck boxes use bright-diamond treadplate aluminum and have sealed gas shock lid supports. These are also available in black or white powder coat.

The waterproof AGRI-COVER™ Switch Control comes fully assembled and epoxy potted with built-in overload protection.

GO ELECTRIC!

Rotating and telescoping motor mount reduces stress, no mid joint to fail.

Rear options available to accommodate doors, auger and more.

YOUR PREMIUM TARPING BRAND!

The 4500 Series HD features a powerful American-made motor with all-metal gearbox and incredibly reliable magnetic brake. Heavy-duty extruded aluminum torsion arms are equipped with patented spiral-reinforced elbows for flexibility to move smoothly over loads.

Available for all trailer makes and models! The 4500 Series HD's motor produces optimal rather than increased torque (which can harm your tarp system). No electrical energy is used to actuate the brake, so there are no electrical connections to misfire. A patented pivoting motor mount allows for any misalignment of the roll tube without stress to the system.
