DETROIT DIESEL® DD15 ENGINE KITS AND PARTS

DD15 RE-RING KIT

- ♦ Kits can be ordered with APR (Anti Polishing Ring) style liners or non APR style liners.
- ♦ Kits can be customized with piston rings for Monotherm style pistons (4mm oil ring) or later style welded pistons.
- ♦ Includes high performance rod and main bearings as shown below.

Part Number

Description

MCIFDD15

Kit - Inframe - Re-Ring

DD15 BEARINGS

These bearings feature a sliding layer that is applied to the load half of the bearings by PVD (Physical Vapor Deposition). This sliding layer is thinner than conventional bearing construction for increased load carrying capabilities. The loaded halves of the bearings also feature Syntech® anti friction coating for durability in high load conditions.
